 View-shed Direction for Photo-realistic modeling.

Project Summary: Summit Energy with Shumaker Consulting

Provide Visual Assessment graphics for Planning Board determination for proposed solar project.

Project Location: 4206 Rte 9W Saugerties, NY 12477

Project scope will be decided by Planning Board regarding visualization limits and study depth.

KFA recommends providing preliminary Visual assessment scope prior to Board meeting to determine project extents. Deliverables include Map of Impact Area, Representational photos of what will be provided.

Board will inform project team of depth. KFA believes board will request one of two options

Option 1: Photo-realistic Renderings

Development: KFA to determine # of renderings from board and conduct a site visit with property owners to find potential viewsheds. KFA to photoshop images to create photorealistic renderings of visual impact of solar farm.

Pros and Cons: Renderings provide real images from neighbors to view as seen from their homes. Photos can be made relatively quickly, however must be made per view. Artist interpretation and accuracy can be questioned by neighbors as being untruthful. Neighbor permissions required.

Option 1a: Photo-Realistic Renderings and Model

Development: Same as above plus KFA creates Sketchup model to show viewsheds from various properties. Some photoshop required to make 2d images more realistic

Pros and Cons: Model provides an opportunity to do multiple views quickly, but model setup takes several days. Model can be shown before the board for quick flyover from multiple properties. Graphics can appear cartoony and not as realistic. This can be mitigated through a combination of 2d renderings and model.

Option 2: Visual Assessment Report

Development: Board can request a Visual Assessment report which requires mapping viewshed areas in GIS and providing logistics of impacts, establishing existing viewsheds, and preparing a mitigation assessment. This includes Option 1 and 1a to be included in the report.

Pros and Cons: Thorough examination of project but will take time to complete all modeling and reporting.
